ALA:-1

❖ Error code:-

```
print("Salary System")
name = input("Enter employee name: ")
basic = input("Enter basic salary: ")
hra = input("Enter HRA: ")
da = input("Enter DA: ")
gross = basic + hra + da
tax = gross * 0.1
net = gross - tax
if net > 50000
print("High Salary")
elif net > 30000
print("Medium Salary")
else
print("Low Salary")
print("Gross:", gross)
print("Net:", netsalary)
for i in range(5):
print(i)
print("System Ended")
```

output:-

```
Run   salarysytem
C:\Users\Dell\PycharmProjects\PythonProject\.venv\Scripts\python.exe C:\Users\Dell\PycharmProjects\PythonProject\salarysytem.py
  File "C:\Users\Dell\PycharmProjects\PythonProject\salarysytem.py", line 9
    if net > 50000
                  ^
SyntaxError: expected ':'

Process finished with exit code 1
```

❖ which error in this code:-

1. input() returns string

basic, hra, da are strings → cannot add or multiply directly.

2. Missing : in if conditions

if net > 50000 ✕→ Missing colon :

3. Indentation missing

Python requires indentation inside if, elif, else, and for.

4 . Variable name mistake

You printed netsalary but variable name is net.

❖ Correct code:-

```
print("Salary System")
 name = input("Enter employee name: ")
basic = Float (input("Enter basic salary: ") )
hra = Float (input("Enter HRA: ") )
da = Float ( input("Enter DA: ") )
gross = basic + hra + da
tax = gross * 0.1
net = gross - tax
if net > 50000 :
print("High Salary")
 elif net > 30000:
 print("Medium Salary")
else :
print("Low Salary")
print("Gross:", gross)
print("Net:", net)
for i in range(5):
print(i)
print("System Ended")
```

Correct code output:-

```
Run   salary

C:\Users\Dell\PycharmProjects\PythonProject\.venv\Scripts\python.exe C:\Users\Dell\PycharmProjects\PythonProject\salary.py
Salary System
Enter employee name: kush
Enter basic salary: 40000
Enter HRA: 5000
Enter DA: 5000
Medium Salary
Gross: 50000.0
Net: 45000.0
0
1
2
3
4
System Ended

Process finished with exit code 0
